Post Operative Instructions Root Canal

After your visit today for root canal therapy please be careful to not bite your tongue or cheeks, they will return to normal within a few hours. Sometimes the injection site will remain sore for several days this is not uncommon and will go away very soon. You can rinse with salt water if necessary.

Your root canal has been completed. The tooth may still be sore for a few days. This is due to the infection and or the breakdown of the tooth. Take any prescriptions you may have been given as instructed.

If you have any questions or concerns don't hesitate to contact our office. We will be glad to answer any questions you may have.
